Herbs and spices

Frank Sannmann, Garden Centre

We use the AS 1200 almost exclusively on potted herbs to control aphids and whiteflies.

In basil we can record very good successes against downy mildew. In addition, the spraying agent consumption is reduced by approx. 40% and the time saving is about 50% compared to the old devices. The comfort and handling of the AS 1200 are excellent.

Application details	
Device:	AS 1200 with REC 15
Nozzle:	AITXA 8002 VK (yellow)
Airspeed level:	3 – 4
Pressure REC 15:	4 – 6 bar (optimal penetration)
Spray liquid:	NeemAzal, Spruzit, Biplantol, Fusek
Area:	2500 m ²
Spray liquid consumption:	Depending on manufacturer's instructions and culture (approx. 40% less than before)

Result / Conclusion by Frank Sannmann:

- Very good penetration
- Great coverage overall
- Also on leaf underside
- Only target areas are occupied
