

AS 1200 with REC 15

## Crop production

### Anwender:

Burmester  
Horticulture Organic Herbs

**Kai Burmester, Horticulture**

We mainly produce herbs, including some unusual species, but also a small amount of sweet fruit, grasses and some pot plants. We use the AS 1200 to control aphids, whiteflies and thrips. The spray consumption is reduced by 25%, the working time remains about the same compared to my old devices. The comfort and handling of the AS 1200 are very good.

Application details	
Device:	AS 1200 mit REC 15
Nozzle:	AITXA 8003 VK (blue)
Airspeed level:	3 – 4
Pressure REC 15:	3 – 4 bar

Area:	5000 m <sup>2</sup> Underglass / 5000 m <sup>2</sup> Outdoor
Spray liquid consumption:	Depending on manufacturer's instructions and culture (approx. 25% less than before)

### Result / Conclusion by Kai Burmester:

- Very drift-proof even with some wind or small gusts
- Best wetting, excellent in the snacking berries
- Very good coverage on the underside of the leaf
- It is a pleasure to work with
