

AS 1200 with A 50

# Crop production

## User:

Garden Centre Thiels, Boischot

Robin, Garden Centre Thiels

I mainly use the AS 1200 in the plant greenhouse to control aphids and spider mites. As we mainly work with biological plant protection products in the Thiels Garden Centre, we need a sufficiently large contact area on the plant for these products. By working with AS 1200 we can save 50% recorded, with the average we have about a third less consumption.

Application details	
Device:	AS 1200 with A 50
Nozzle:	AITXA 8002 VK (yellow)
Airspeed level:	2 – 3
Pressure A 50:	3 – 4 bar
Spray liquid:	Biological plant protection products
Area:	2000 m <sup>2</sup>
Spray liquid consumption:	50 l (approx. 30% less then before)

## Result / Conclusion by Robin:

- Very good penetration and both the upper and lower sides of the leaves are wetted
- Time saving. It used to take me about an hour to treat all the plants, and now with the AS 1200 it takes about half the time
- I used to use about 1.5 tanks of 50 litres and now I get by with 1 tank (1/3 liquid saving)
- I can recommend it to everyone
