

AS 1200 with REC 15

Pest control

User:

BITIS disinfestazioni SA, Lugano

Owner Dario Cattaneo

The treatment of facades with the AS 1200 brings an expenditure of time (estimated about 20%), because the spray liquid can be spread on larger surface areas (compared to the XL 8).

Application details	
Device:	AS 1200 with REC 15
Nozzle:	AITXA 8003 VK (blue)
Airspeed level:	3 – 4
Pressure REC 15:	3.5 bar
Spray liquid:	Insecticide against spiders, brown marmorated stink bug and flies
Area:	Individually (houses, facades, sub-roofs)
Spray liquid consumption:	15 – 100 liters

Result / conclusion of Dario Cattaneo:

- The AS 1200 is used for the upper part of the facade and for the sub-roof.
- The advantage of the AS 1200 is in the efficiency (time reduction about 20%).
The spray liquid can be spread on larger surface areas, as when working with the XL 8.
- The XL 8 is mainly used for indoor applications.
