

AS 1200 with REC 15

Pest control

User:

PT. Orcid Mantis Indonesia

Mrs. Marina S. Karema CEO

We do cold fogg for Mosquito in office factories and also misting for Store Product Insect at warehouses. For misting at the warehouses in big area we need about 30 – 60 liters solution. Therefore, we need equipment that can do both or more (plus spraying).

Application details	
Device:	AS 1200 with REC 15
Nozzle:	NF 125
Airspeed level:	3
Pressure REC 15:	2 bar
Spray liquid:	Pesticide with EW or EC Formulation
Area:	approx. 3200 m ²
Spray liquid consumption:	approx. 1 liter

Result / conclusion of Mrs. Marina S. Karema:

- Consumption of the spray liquid about the same (based on chemical manufacture)
- Time saving about 20%.
- Professional appearance and high performance
- Longer spraying distance compared to other devices
- Longer life of spare parts and batteries
- Overall impression of the AS 1200 is very good
